-* SPECIAL NEWS RELEASE FROM THE ANTI-BELL GROUP *-

RELEASED ON AUGUST 6 1994

The following 'special' 1-800 phone numbers are usable by any Canadian/USA hacker/phreaker to directly contact the operators in the following 49 countries. These 1-800 dial directly to the operator of the country of destination and bypass the Canadian phone system.

This means that in any of these countries where you can use TONES to break the line and seize the phone system from the OPERATOR you can become the operator and make world wide phone calls at the expense of the originating countries phone system.

These numbers should only be used by those phreakers who have experience at TONES and seizing the phone lines from the operator. These numbers were all valid as of August 6 1994 !

These phone numbers are also of interest to anyone who has phone access that will permit them to call into Canada and divert onto these numbers. Americans take note that you must first get hold of a number originating in CANADA to use these 1 800's to dial out. They will not work directly from within the United States although I assume that there must be something like these 1 800's that can be dialed directly from within the United States. So until you Yanks find the numbers that work from within the States, call up to a Canadian divertor and than use these to make the world your playground courtesy of Bell Stentnor Group.

REMEMBER - these 1-800's only work if you are originating your call from a phone in Canada or diverting from a phone in CANADA
- these numbers bypass the Canadian phone system and put you through directly to the OPERATOR in the country you are calling
- many countries are hip to the old 2600 tone tricks but some are still pretty stupid - look at Denmark and Spain as two primary examples of countries that still fall for the TONE tricks ahahahah

Enjoy and have fun with these 1 800 numbers dudes... and let Ma Bell know you appreciate this 'convenient' way of allowing Canadian hackers/phreakers to gain easy access to the phone systems of the countries listed above.

And remember, only use and abuse these 1 800's if you know how to use tones to seize a phone line from an operator. The last thing we need are some wienies phucking around on these 1 800's who don't know what they are doing...
